

Blue Bird PLOW

Scour in Adobe Soil

Any one who has used a Blue Bird Plow will acknowledge that they do the easiest and best work of any of the all-purpose, turning, walking plows. These illustrations show the reasons why. The Blue Bird is built up on a pressed steel frog. The beam, share, mould board and landside all being fastened to and built up directly on this frog. The slip bed, which can be replaced at a small cost, enables an old plow to run as easily and as true as a new one. Blue Birds are fitted with soft center mould boards, which insure their scouring in adobe or any other soil.
